Dear RFI TCB,

It is requested that the following information for the product listed above is to be permanently held confidential on behalf of Plextek Ltd.

**Blighter B400 series: All internal photographs, the User Manual.**

**The device is a non-consumer device and is inaccessible to the general public.** It is generally mounted on a tower and is only serviceable by the licensee or his designated technicians.

**The user manual is very technical and is only provided to the user under NDA.** The manual is marked as confidential, and circulation of confidential documents is restricted by the NDA. The user cannot service the device. It is not a manual designed for consumer use because it is not a consumer product.

**Internal photographs provided for the FCC are not supplied to the customer or general public in any form.**

Plextek's Blighter radar is the only Ground Surveillance Radar in its class offering a unique set of features that together make Blighter very attractive to the security market and competitors.

All the radar design has occurred within the secure Plextek site in the UK. No one company is responsible for manufacturing all critical parts of the design. Final

assembly and test occurs within Plextek, where production standard firmware and software is installed. The radar is treated as a Line-Replaceable-Unit (LRU) and the radar enclosure is sealed with tamper resistant steel cable seals, therefore no-one should be able to access the internal design of the radar.

No aspects of the detailed design have been released to any other third parties. External manufacturers have access to certain parts of the design, but no one manufacturer has access to all parts of the design.

Yours sincerely

Mark Radford

Director of Security Products
